# BUILDING INFORMATION MODELLING (BIM) **POLICY**

Readie Construction Ltd  
Policy Statement - Feb 2023

## Building Information Modelling Policy

February 2023

This policy statement has been prepared to show Readie Construction Limited's dedication to delivering Building Information Modelling (BIM) in-line with BSI Standard Publications BS EN ISO 19650-1:2018, BS EN ISO 19650-2:2018 and ISO **19650-4:2022**

We are proud holders of the BSI BIM Kitemark for Design, Construction and Commissioning, complying with the UK BIM framework and the aforementioned standards.

We are fully committed to the deployment and implementation of BIM; working closely with our clients to establish the project Exchange Information Requirements (EIRs) ensuring they are delivered to meet project milestones from inception, through to completion and beyond, enabling them to fulfil Computer Aided Facilities Management (CAFM) aspirations.

We have invested in BIM technologies and in-house capabilities that align with our project and site management processes and have a Common Data Environment (CDE) in place to assist in meeting project EIRs. We are rolling out technical and management training to all our staff with 'BIM Champions' within each discipline.

We are engaging with our supply chain to help develop their own BIM processes and capabilities to enable us to meet project BIM requirements.

The Chairman, Directors and Senior Management of RCL are committed to continuous review and improvement of our BIM processes; working closely with our project teams to ensure that the agreed benefits are achieved and that lessons learned are captured to drive continuous improvement across the company, as a whole.

Adequate resources, commitment and the participation of all employees will ensure the continuation and development of our BIM output.

Kevin Pickton  
Technical Director  
03/03/2023
